FUND OVERVIEW

- The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets.
- The Fund invests globally at least 70% of its total assets in the equity securities (e.g. shares) of companies the main business of which is the mining and/or production of base and precious metals and/or minerals.
- The Fund does not hold physical gold or metal.

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Investments in mining securities are subject to sector-specific risks which include environmental or sustainability concerns, government policy, supply concerns and taxation. The variation in returns from mining securities is typically above average compared to other equity securities.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices.
Article 9: Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Price to Book Ratio: represents the ratio of the current closing price of the share to the latest quarter's book value per share.

Average Market Cap: The average market capitalization of a fund's equity portfolio gives you a measure of the size of the companies in which the fund invests. Market capitalization is calculated by multiplying the number of a company's shares outstanding by its price per share.

Price to Earnings: A valuation ratio of a company's current share price compared to its per-share earnings in the current forecast year, calculated as current share price divided by current earnings per share.

IMPORTANT INFORMATION:

¹Negative weightings may result from specific circumstances (including timing differences between trade and settlement dates of securities purchased by the funds) and/or the use of certain financial instruments, including derivatives, which may be used to gain or reduce market exposure and/or risk management. Allocations are subject to change

The Morningstar Medalist RatingTM is the summary expression of Morningstar's forward-looking analysis of investment strategies using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Analysts assign three pillar ratings (People, Parent and Process) based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. For more detailed information about these ratings and methodology, please go to global.morningstar.com/managerdisclosures. The ratings are not statements of fact, nor credit or risk ratings. The rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks which may cause expectations not to occur or to differ from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions, (iv) involve the risk that the return target will not be met due to unforeseen changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange and tax rates, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product.
