General Notifications

The present Fees & Charges table includes the basic fees and charges for standard transactions and products, which may be increased or reduced in special cases. For that reason, as well as for transactions not included in this table, it is recommended that you contact the Bank before any transaction.

The transaction terms included herein are subject to the regulatory framework as well as to the Bank's General Terms of Transactions as valid from time to time.

The Fees & Charges table is updated periodically.

Value dates are always expressed in Business Dates.

Where applicable, cut-off times, beyond which the order for execution of the Payment Transaction is deemed to have been received the next Business Day, are displayed. Maximum execution time since the order is received by the Bank, according to L.4537/2018 is also depicted.

All mail, telephone, facsimile charges or real costs (legal fees, correspondent banks' fees etc.), where applicable, are borne by the client.

Currency rates within the Eurozone are formed on a daily basis. Relative information is available either through exchange rate tables in the Bank's branches or by contacting the Bank.

For foreign exchange transactions, fees are calculated on the Euro equivalent of the transaction amount.

Information on fees and charges regarding any correspondent banks, which might be applicable to the beneficiary, is not available to the Bank. Therefore, the ordering client must always contact the beneficiary prior to a payment execution and arrange which party will bear subject costs.

Note

In case of a foreign currency transaction, its amount is converted into Euro by the International Organization (Visa, Mastercard), holder of the card sign, based on the reference rate used by the Organization as the case may be, on the date and time of the transaction clearance. Additional charges by the above mentioned Organizations for transactions in foreign exchange performed abroad may be applicable. Information regarding the exchange rates used by the Organizations, as valid from time to time, as well as the mechanisms used for calculation, are available at the Organizations web pages. Given the fact that exchange rates are constantly variable, the time lapse between the transaction in foreign currency and its clearance might lead to a different debit amount.
