#### Q1 Commentary

After 13 years, Greece regained its investment grade and was named Country of the Year by The Economist while returning to the production of primary surpluses. Company earnings remain strong, being the driving force of the market. Despite its positive performance in 2023 and a strong start to the first quarter of 2024, the Greek market remains attractive, trading at 8.1 times (P/E) the estimated earnings for 2024. The banking sector recorded a performance of +12.6% in the first quarter of 2024, anticipating the completion of privatizations by the Hellenic Financial Stability Fund (HFSF) and the first quarter of 2024, while Triton (LF) Greek Equity (Class A) recorded a return of +9.14%, underperforming the index by 85 basis points.
