What is this product?

Type

This is an open ended UCITS fund.

Term

The fund is established for an unlimited period. In certain circumstances the fund may be unilaterally terminated in accordance with legal requirements.

Investment objective

The fund aims to provide income and capital growth by investing in bonds issued by governments and companies worldwide. The fund aims to mitigate losses in falling markets. The mitigation of losses cannot be guaranteed.

The fund is actively managed and invests at least two-thirds of its assets in investment grade bonds and high yield bonds issued by governments, government agencies, supra-nationals and companies worldwide, including emerging market countries.

The fund may invest in excess of 50% of its assets in bonds that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds); up to 20% of its assets in asset backed securities and mortgage-backed securities; up to 10% of its assets in convertible bonds (including contingent convertible bonds); and up to 10% of its assets in open-ended investment funds.

The investment manager aims to mitigate losses by diversifying the fund's asset allocation away from areas of the market identified as having a high risk of material negative return.

The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, warrants and money market investments, and hold cash (subject to the restrictions provided in the prospectus).

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently. The fund may take short positions.

The fund is valued with reference to the net asset value of the underlying assets.

Benchmark: The fund does not have a target benchmark. The fund's performance should be compared against the Bloomberg Mv ex Treasury

A+ to B- USD Hedged Index, the Bloomberg Global Aggregate Corporate USD index, the Bloomberg Global High Yield USD index, and the JP Morgan EMBI Global Total Return index. The comparator benchmarks are only included for performance comparison purposes and do not determine how the investment manager invests the fund's assets. The fund's investment universe is expected to overlap materially with the components of the comparator benchmarks. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the comparator benchmarks. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund. Please see appendix III of the fund's prospectus for further details.

Currency: The sub-fund currency is USD. The share class currency is EUR.

Dealing Frequency: You may redeem your investment upon demand. This fund deals daily.

Distribution Policy: This share class pays a quarterly distribution at a fixed rate of 4.50% per annum of the value per share. The distribution policy is kept under review.

Depositary: J.P. Morgan SE

Intended retail investor

The fund may be suitable for investors who are seeking income, combined with capital growth opportunities in the relative stability of the debt markets over the long term. The fund is intended for retail investors who have a basic investment knowledge and an ability to bear large short-term losses. This investment should form part of a varied investment portfolio. This fund is suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

What are the risks and what could I get in return?

Risks

! The risk indicator assumes you keep the product for 3 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you.

Performance Scenarios

We have classified this product as 3 out of 7, which is a medium-low risk class.

The fund is in this category because it seeks to provide rewards whilst limiting price volatility.

Be aware of currency risk. In some circumstances you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

You can find more information about the other risks in the prospectus at www.schroders.com.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and suitable benchmark over the last 10 years. The scenarios

shown are illustrations based on results from the past and on certain assumptions.

The stress scenario shows what you might get back in extreme market circumstances.

The Unfavourable scenario occurred for an investment between 10 2019 to 10 2022

The Moderate scenario was simulated based on the appropriate benchmark used for an investment between 10 2016 to 10 2019

The Favourable scenario was simulated based on the appropriate benchmark used for an investment between 09 2014 to 09 2017

What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

The fund's assets are held in safekeeping by its depositary, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A. In addition, the fund's assets are segregated from the depositary's assets, which limits the risk of the fund suffering loss in case of default or insolvency of the depositary or someone acting on its behalf. However in the event of any loss, there is no compensation or guarantee scheme in place which may offset such loss.

What are the costs?

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10 000,00 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	EUR 488	EUR 941
Annual cost impact (*)	4.9%	3.0% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4,4 % before costs and 1,4 % after costs.

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.
