

HSBC Global Investment Funds

EUROLAND VALUE

Marketing communication | Monthly report 30 November 2024 | Share class ACHUSD

Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of Eurozone shares, while promoting environmental, social and governance (ESG) characteristics. The Fund qualifies under Article 8 of SFDR. The Fund aims to have a higher ESG score than its reference benchmark.

Investment strategy

The Fund is actively managed.

In normal market conditions, the Fund will invest at least 90% of its assets in shares (or securities similar to shares) of companies of any size, that are based in in any European Monetary Union member country.

The Fund includes the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process to help assess risks and potential returns.

Companies and/or issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies, which may change from time to time.

The Fund may invest up to 10% in Real Estate Investment Trusts, may invest in bank deposits and money market instruments, and may also invest up to 10% in other funds.

See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

Risk Disclosure

- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
