

HSBC Global Investment Funds

GLOBAL EQUITY SUSTAINABLE HEALTHCARE

Marketing communication | Monthly report 30 November 2024 | Share class ACOEUR

Investment objective

The Fund aims to provide long term capital growth and income by investing in a concentrated portfolio of shares of companies that may benefit from increasingly constrained healthcare budgets worldwide, while promoting ESG characteristics. The Fund qualifies under Article 8 of SFDR.

Investment strategy

The Fund is actively managed.

In normal market conditions, the Fund will invest at least 70% of its assets in shares (or securities similar to shares) of Healthcare Companies of any size, that are based in developed and emerging markets. Healthcare Companies have current and/or expected revenue exposure to sustainable healthcare products; they are determined by HSBC proprietary analysis process including sustainable healthcare scores.

Companies and/or issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies, which may change from time to time.

The Fund can invest up to 40% in China A and China B-shares, up to 10% in other funds, and may invest in bank deposits, money market instruments and funds for treasury purposes.

See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- The Fund may be concentrated in a limited number of securities, economic sectors and/or countries and as a result, may be more volatile and have a greater risk of loss than more broadly diversified funds.

Risk Disclosure

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
