Investors should also read [Risk Descriptions](#) in the Prospectus for a full description of each risk.

Investment risks *Risks from the Sub-Fund's techniques and securities*

Techniques	Securities	
Hedging	China Emerging markets	Equities Smaller companies

Other associated risks *Further risks the Sub-Fund is exposed to from its use of the techniques and securities above*

Currency	Liquidity	Market
----------	-----------	--------

Outcomes to the Shareholder *Potential impact of the risks above*

Loss	Volatility	Failure to meet the Sub-Fund's objective.
Shareholders could lose some or all of their money.	Shares of the Sub-Fund will fluctuate in value.	

General Disclosures

Before investing, obtain and review the current prospectus, Key Information Document (KID) and any applicable local offering document. These documents, as well as the sustainability-related disclosures, the annual and semi-annual reports and the articles of incorporation, are available in English free from your financial adviser, your J.P. Morgan Asset Management regional contact, the fund's issuer (see below) or at www.jpnam.lu. A summary of investor rights is available in English at <https://am.jpmorgan.com/lu/investor-rights>. J.P. Morgan Asset Management may decide to terminate the arrangements made for the marketing of its collective investment undertakings.

This material should not be considered as advice or an investment recommendation. Fund holdings and performance are likely to have changed since the report date.

To the extent permitted by applicable law, we may record telephone calls and monitor electronic communications to comply with our legal and regulatory obligations and internal policies. Personal data will be collected, stored and processed by J.P. Morgan Asset Management in accordance with our EMEA Privacy Policy www.jpmorgan.com/emea-privacy-policy

For additional information on the sub-fund's target market please refer to the Prospectus.

Risk Indicator - The risk indicator assumes you keep the product for 5 year(s). The risk of the product may be significantly higher if held for less than the recommended holding period.

The ongoing charge is the charge used in the EU PRIIPs KID. This charge represents the total cost of managing and operating the fund, including management fees, administrative costs, and other expenses (excluding transaction costs). The breakdown of costs are the max as detailed in the fund's prospectus. For more detailed information, please refer to the fund's prospectus and the PRIIPs KID available on our website.

Performance information

Source: J.P. Morgan Asset Management. Share class performance is shown based on the NAV (net asset value) of the share class with income (gross) reinvested including actual ongoing charges excluding any entry and exit fees.

The return of your investment may change as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation.

Indices do not include fees or operating expenses and you cannot invest in them.

The benchmark is for comparative purposes only unless specifically referenced in the Sub-Funds' Investment Objective and Policy.

Definitions

NAV Net Asset Value of a fund's assets less its liabilities per Share.

Overall Morningstar Rating™ assessment of a fund's past performance, based on both return and risk and shows how similar investments compare with their competitors. Investment decisions should not be based on a high rating alone.

Correlation measures the strength and direction of the relationship between movements in fund and benchmark returns. A correlation of 1.00 indicates that fund and benchmark returns move in lockstep in the same direction.

Alpha (%) a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.

Beta measures a fund's sensitivity to market movements (as represented by the fund's benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant. Usually the higher betas represent riskier investments.

Annualised volatility (%) measures the extent to which returns vary up and down over a given period.

Sharpe ratio performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.

Tracking error (%) measures how much a fund's returns deviate from those of the benchmark. The lower the number the closer the fund's historic performance has followed its benchmark.

Information ratio measures if a manager is outperforming or underperforming the benchmark and accounts for the risk taken to achieve the returns. A manager who outperforms a benchmark by 2% p.a. will have a higher IR than a manager with the same outperformance but who takes more risk.
